THE

Traveller's *and* Chapman's

Daily Inſtructor, &c.

THE *Prime* or *Golden Number*, is a Number proceeding from One to Nineteen, and ſo to begin at One again.

It is called the *Golden Number* becauſe it was writ in *Golden Characters*, in Tables of Silver, and ſent from *Alexandria* in *Egypt* to *Rome*.

The reaſon why the *Golden Number* doth not exceed 19, is becauſe the ☽ doth make all her ſundry Motions and Changes in 19 Years, and then returneth to the place where ſhe firſt began; it always Changes on the firſt day of *January*.

It is found thus; add 1 to the Year of our Lord (for ſo much was the Prime when Chriſt was Born) which divided by 19, and the Remainder (if any be) is the *Golden Number*, but when there is no Remainder, 19 is the *Golden Number*.

The *Dominical Letter* is always one of theſe 7, A, B, C, D, E, F, G, one of which doth ſhew the Sunday Letter all the Year, unleſs it be *Biſſextile* or *Leap-Year*; then there be two *Dominical Letters*, the firſt of the two ſerveth from the 1ſt of *January* to St. *Matthias* day, the other from thence to the end of the Year; and then there is a Day more added to *February*, it being the ſhorteſt Month; for when it is *Leap Year* it hath 29 Days, and in other Years but 28. The *Dominical Letter* Changeth every Year, on the 1ſt day of *January*.

For to find the *Dominical Letter*, add to the Year its fourth, and four, and then divide thoſe Three Numbers by Seven, and Subſtract what remains from Seven, and the Remainder ſhews the *Dominical Letter*, accounting A 1, B 2, C 3, &c.

The Letter A always begins the Year the 1st of *January*, B the 2d day, C the 3d day, *&c.*

To find the *Leap Year*, divide the Year by 4, and if there be no Remainder it is *Leap Year*; but if there remains 1, 2, or 3, then one of those are the First, Second, or Third after *Leap Year*.

To know how many Days there is in every Month, remember the following Verse, and thereby you will know when every Month doth End.

Thirty Days hath *September*,
April, *June*, and *November*.
Eight and Twenty hath *February* alone,
All the rest hath Thirty One.
But when *Leap Year* cometh, the time,
Then *February* hath Twenty Nine.

The Letters that every Month begins with, is the Black Letters in the following Verse.

January,	February	March,	April,	May,	June,
At	Dover	Dwells	George	Blount	Esquire
July,	Auguſt,	September,	October,	November,	December
Good	Charles	Finch	And	David	Fryer.

The *Epact* is the Number of 11 days, which the Solar Year doth exceed the Lunar; the one conſiſting of 365 days, and the other 354; ſo that in every 4 Years there is a Number added more than 30, which being greater than the *Epact* can be (for from Change to Change there can be but 30 days) therefore 30 being taken from the Exceſs, the Remainder is the *Epact* for the next Year.

To find the *Epact* for ever, Multiply the *Golden Number* of the Year by 11, and the Product whereof, if it be under 30 is the *Epact*; but if above 30, then divide the Product by 30, and the Remainder is the *Epact* in the *Julian* or *Engliſh* Account, or add 11 to the *Epact* this Year, ſo have you the *Epact* for the next Year.

By Subſtracting 11 from the *Epact* of the Old Account, you ſhall have the *Epact* of the *Gregorian* or *New* Account; but if the *Epact* be leſs than 11, then add 30 to it, and make the Subſtraction as before: ſo ſhall you have the *Epact* of the New Account: This will laſt till 1800. *Note*,

Note, That when the *Golden Number* is 3, 6, 9, 12, 15 or 19, the *Epact* is the ſame in the *Engliſh* Account.

When the *Golden Number* in the *Engliſh* Account is 1, 2, 4, 5, 7, 8, 10, 11, 13, 14, 16, 17, 19. The *Epact* is, 11, 22, 14, 25, 17, 28, 20, 1, 23, 4, 26, 7, 29. The *Epact* changes always on the 25th day of *March*, and is the Age of the Moon the 28 of *February*.

The Cicle of the Sun is a Number proceeding from 1 to 28, and ſo to begin at 1 again, for in 28 Years the *Dominical Letters* make all their ſundry Changes, and is called the *Solar Cicle*, or *Sunday Cicle*, becauſe it comprehends all the Varieties and Changes that the Sunday Letter can have, by reaſon of *Biſſextile* or *Leap Year*: In ſhort, this Cicle is called the Cicle of the Sun, becauſe it acquaints you with the *Sunday Letter*, which is the day of the Sun.

To find the *Cicle* of the *Sun*, add to the Year of our Lord (for our Saviour was Born when the Number was 9) and divide by 28 (as by the Number of Years of the whole *Cicle*) and the Remainder, if any be, is the *Cicle*, but if there be no Remainder, then it is 28, ſo ſhall the Quotient ſhew the Number of Revolutions of the ſaid *Cicle*, and the Remainder of the ſaid *Cicle* of the *Sun*: It is always alike in both Old and New Account.

Of the Four Terms and their Returns.

For the hearing and determining of all kind of Contracts, Diſcord, and ſuch like, in the Common-Weal: There be Four times in the Year which are called Terms, becauſe the Learned Judges then ſit to put an End of Contentions and Debates between Party and Party. Now every of theſe Four Terms conſiſts of 4, 5, or 6 Returns, every Return of Four days, and every day ſerving unto a ſeveral Purpoſe. *Note*, therefore, that every Term hath but part, or all of theſe Returns, *viz*. *Craſtino*, *Octabis*, *Quindene*, *Tres*, *Manſe*, and *Quinque*.

Every Return hath a Baſis or known day, from whence they take their Denomination, and be reckoned, the ſignification of which Six kind of Returns is thus; *Craſtino* is the Morrow after the *Baſis*, or day nominated as *Craſtino Triniſatis* is the Morrow after *Trinity Sunday*, Trinity Sunday being the Baſis, and the day that gives the Denomination. *Octabis* is 8 days after inclusively. *Quindene* is 15 days after,

Tres is 3 Weeks after, and *Mense* a Month after, and *Quinque* is 5 Weeks after.

Now every of these Returns have four several days they consist upon, the first whereof hath double signification, the one is the day of Return, and the other the day of Essoyne for the Defendant in a Personal Action, or the Tenant in a Real Action to be Essoyned; the second is the day of Exceptions for the Plaintiff or Demandant, to lay an Exception, if no Essoyne be Cast, that the Defendant shall not be Essoyned or Amerced: The third is *Returna Brevium*, that is, the day whereon the Sheriff must Return the Writ; and the 4th is the day of Appearance for Parties and Jurors in the Court of Common-Pleas.

But if any of these days fall upon a Holy day, that is no Court day, as in *Easter Term* upon *Ascension* day, in *Trinity Term*, upon St. *John Baptists* day, in *Michaelmas Term* upon *All Saints* and *All Souls*, and in *Hillary Term*, upon the *Purification* of our B. Lady, or upon any *Sunday* (all which be not Court days) then must the next day following serve for Both, as if the Essoyner day fell upon a *Sunday*, then *Monday* must serve for Essoyne day, and day of Exception Both.

As for these days, they have all most Use in the Common-Pleas, where all Suits Commence by Original, *&c.* But for *Latitats*, or other Process upon a Bill Certain, it is upon a Day Certain, as *Die Lunæ prox post Purif.* which always is reckoned from the Essoyne day.

In the *Chancery* Court they use none of these Returns, but only the day of Appearance, which is *Quarto die post.*

Yet Note well, if a *Capias*, *Exigent*, *Scire Facias* or *Distringas*, be Executed after the Essoyne day, by the Sheriff, or a Commission Set upon, out of any of the aforesaid Courts, after the said Essoyne day, it is neither Justifiable, nor Warrantable.

Hillary Term, first day shall be,
When *January* counts Twenty Three,
And *February's* Twelfth doth put
An End to it, without all Dispute.

And hath Four Returns, *viz.*

Octab. Hill.	20 *January.*
Quind. Hill.	27 *January.*
Cro. Pur.	3 *February.*
Octab. Pur.	9 *February.*

On *Wednesday* Fortnight after *Easter*,
This Term doth End, I do protest Sir,
And when *Ascension* day is past,
Till *Monday* next this Term doth last.
And hath 5 Returns, *viz.*

Quind. Pas. A Fortnight,
Tres. Pas. Three Weeks,
Mens. Pas. A Month,
Quinq. Pas. Five Weeks,
} after *Easter*.

Cra. Ascen. the next day after *Ascension* day.

On *Friday* after *Trinity*,
This Term begins assuredly,
And if our Lawyers we may trust,
It ends the *Wednesday* fortnight just.
And hath 4 Returns, *viz.*

Cra. Trin. The same day,
Octab. Trin. Eight days,
Quind. Trin. Fifteen days,
Tres Trin. Three Weeks,
} after *Trinity Sunday*.

He that St. *Michael's Term* wou'd find,
October's Twenty Third must mind,
And th' Twenty Eight of *November*
This Term doth End, I well remember,
And hath Six Returns, *viz.*

Tres Mich. 20 *October*.
Mens. Mich. 27 *October*.
Cra Animar. 3 *November*.
Cra. Martini, 12 *November*.
Octab. Martini, 18 *November*.
Quind. Martini, 25 *November*.

Of TIME.

Time is the measurer of motion, or a Number measuring the moving of the first movable and other mutable Things, which Time had its beginning with the World, and shall end with the same, containing Three Parts, *viz.* Past, Present, and to Come. Time Present called (*Now*) being a Moment,

Moment indiviſible, or the leaſt part of Time, and yet the beginner and ender of Time; even as a Point is the leaſt part of a Line, and yet beginneth and endeth the ſame; for *nunc* (now this inſtant) doth knit *Tempus præteritum & futurum*, ending Time paſt, and to come. There is alſo a Space of Time, called *Seculum*, an Age, or a Hundred Years. Another Space of Time call'd *Evum*, being Ten Ages: The leſſer parts of Time are Five, the firſt called *Quadrans*, the fourth part of a natural Day, or Six Hours; the ſecond *Punctum*, the fourth part of an Hour in the Suns Account, and in the Moons the fifth part; the third *Momentum*, the tenth part of *Punctum*; the fourth *Uncia*, the twelfth part of *Momentum*, the fifth and laſt *Atomus*, the 44th part of *Uncia*.

Of the DAY.

The Day is of two ſorts, Natural and Artificial; the Natural Day is the ſpace of 24 Hours, in which time the Sun is carried by the firſt mover from the *Eaſt* into the *Weſt*, and ſo round about the World into the *Eaſt* again. The Artificial Day is from the Suns Riſing to its Setting, and the Artificial Night is from the Suns Setting to its Riſing. The Day is accounted with us for payment of Money between the Suns Riſing and Setting; but for Indictments for Murther, the Day is accounted from Midnight to Midnight, and ſo likewiſe are Faſting days.

Of a WEEK.

A Week hath divers Names, in *Latin* it is called *Septimana, à Septem & Mane*, which is as much as to ſay, Seven Mornings or Seven Days; whereof the firſt is called *Sunday*, the ſecond *Monday*, the third *Tueſday*, *&c.* Which Names the Gentiles gave to the Seven Planets, whom they worſhipped as Gods; for they called the firſt day, the day of the *Sun*, the ſecond, the day of the *Moon*, *&c.*

Of a MONTH.

Of Months there are three kinds, *Solar*, *Lunar* and *Uſual*, the *Solar Month* is the ſpace of time that the Sun runneth through one Sign of the *Zodiack*, being 30 days. The

The *Lunar Month* is the ſpace of time which the Moon ſpendeth, whilſt departing from the Sun ſhe returns again.

The *Uſual Month* is the Number of days which are ſet down in the common Almanack, Printed for the Company of Stationers; whereof ſome contains 30 days, ſome 31, and *February* 28, and in Leap-Years 29 days.

Romulus firſt divided the Year into 10 Months, and called the firſt Month *Martius à Marte*, the ſecond *April ab Aperiendo*, the third *May à Majoribus*, the fourth *Junius à Junioribus*, the reſt *Quintilis*, *Sextilis*, *Septemb*, *October*, *&c.* becauſe they were 5, 6, 7, 8 *&c.* Months diſtant from *March*; but after *Numa Pompilius* added 2 Months more to make 12, calling the one *January à Janua*, becauſe it is a Gate or Entrance to paſs by into the Year, and the other Month *February à Februo*, that is *à Plutone*; becauſe then the *Romans* offered Sacrifice to *Pluto* and the Infernal Gods.

Julius Cæſar in his time altered the Month *Quintilis* to *July*, calling it after his own Name, for he was Born in that Month; after that *Auguſtus Cæſar* called the Month *Sextilis Auguſt*.

Of the Julian Year, or our Vulgar Year, and of the Leap Year.

It is called in *Latin Annus*, from *Annulus* a Ring, in reſpect they both turn round in themſelves.

There be divers kind of differences of Years, and divers Computations, had thereof in divers Ages, and amongſt divers Nations, but we in *England* do begin the Year the firſt of *January*; and the Church of *England*, and the date of all Writings, and ſuch like hath their Years to begin upon the 25th day of *March*.

A Year is the ſpace of time, wherein the Sun runs thro' the Twelve Signs of the *Zodiack*, containing Twelve *Solar* Months, 13 *Lunar* Months, 52 Weeks, 365 Days, 6 Hours and 6 Minutes; which 6 Hours in 4 Years time, being added together, makes One Day, which we call Biſſextile or Leap-Year, which Day is added to *February*, becauſe it is the ſhorteſt Month, making that Month every fourth Year 29 days, which at other times is but 28. and then the 28th and 29th are accounted but one day. This Account was thus named by *Julius Cæſar* the firſt Roman Emperor, who reduced the Year to a better Method than before, and from him

him it was called the *Julian Account*; yet ſtill the Six Minutes remain unnumbred, which in that time aroſe to ſome days, and therefore *Gregory*, Pope of *Rome*, to make the Year exactly anſwerable to the Sun's Diurnal Courſe, caſting up the Days which theſe Minutes amounted unto, placed his Feſtivals exactly anſwerable to the Sun's Progreſs, which in 1700 Years hath amounted unto Eleven Days, and is from him called the *Gregorian Account*, being uſed in all thoſe Parts beyond the Sea, which acknowledge the Pope's Supremacy.

To find the Age, Change, Full *and* Quarters *of the* Moon.

To find the Age of the Moon, Add the day of the Month propoſed, alſo the Number of Months from *March*, counting *March* (1) and the Epact for the Year, all three together, and the Sum is the Age of the Moon, if it be leſs than 30, but if that Sum exceed 30, caſt away 30 as oft as you can, and the Remainder is the Age of the ☽, that is, if the Month propoſed have 31 days, but if leſs caſt away but 29, and in *February* you muſt caſt away 29, if your Numbers added together exceed it, and the reſt is your deſire.

Now if you wou'd know the Age of the Moon any Month, and would know how old ſhe ſhall be the ſame day the next Year, you muſt add to her preſent Age 11 days, ſo have you her Age the ſame day of the Month the next Year, and to that Age add 11, ſo have you her Age the ſecond year enſuing, and ſo infinitely remembring to caſt away 30, as before.

Likewiſe, if you deſire to know the Age of the Moon in the Year laſt paſt, that is found by Addition of 19, as before by 11, remembring the caſting away 30.

To find the New, Full, *and* Quarters *of the* Moon.

If you would know when it is Full Moon, it is what her Age wants of 15, and for her Change, what her Age wants of 30, and thus have you the day of Full and Change.

To

To find the Time of High Water *at* London Bridge *any Day in the Year, for Ever.*

Multiply the D's Age by 4, and that Product Divide by 5, and the Quotient ſhall be the Hours, and the Remainder of the Diviſion the Minutes that the D is *South*, to which add 3 Hours, and you have the Time of High Water.

To find the Hour *of the* Night *by the* Moon's Shadow *on a* Sun-Dial.

Find at what time the D comes to the *South*, as before, which known, ſee how much the Shadow upon the Dial wants of 12, which take from the time of the D's coming to the *South*, the Remainder is the Hour of the Night; but if the Shadow be paſt 12 add thoſe Hours to the coming to the *South*, and the Sum is the Hour of the Night.

Directions for the finding the Day of the Month, and Day of the Week, in any Year for 38 *Years to come.*

NOTE, That under the following Twelve Months (in the Left hand Pages) are the Name and Explanation of the Months, and each Page conſiſts of Eight Columns; the firſt is the *Dominical Letters*, the ſecond the Number of *Days* in every *Month*, the third (*) which directs to every *Remarkable Day*, which is on the Right Hand Page, the fourth is the *Sun's Place*, the fifth the *Sun's Riſing*, ſixth the *Sun's Setting*, ſeventh the *Length of the Day*, and the eighth the *Length of the Night*.

First find the *Dominical* or *Sunday Letter* for any Year in the second Column of the following Tables; which shews the *Dominical Letter*, *Epact*, *Golden Number*, &c. then find the same in the first Column under the Month requir'd, counting that *Letter*, *Sunday*, the next Letter under that, *Monday*, the next, *Tuesday*, &c.

As for Example.

1. To know what day of the Month the third *Wednesday* in *January* is on, in the Year 1705. I find by the Table the *Dominical Letter* that Year to be (G) which is *Sunday*, A *Monday*, B *Tuesday*, and C *Wednesday*; so that the third *Wednesday* will be the 17th day.

2. To know what day of the Week will the 29th of *October* be on in the Year 1710. I find (A) to be the *Dominical Letter* for that Year, B *Monday*, C *Tuesday*, and D *Thursday*; so that the 29th of *October* will then be on a *Sunday*, and by the same Rule you may find the Day of the Month, or Day of the Week, for any other Year to come.

As for the *Moveable Feasts* and *Terms*, there needs no Example for the finding of them, they being plainly set down in the Tables.

The Fixt Feasts and Remarkable Days which are mentioned and explained in the Right Hand Page, in the following 12 Months, ready to be found for Ever, without the help of an *Almanack*.

5 *Ezekiel* saw his Visions. *Ezek.* 1. 1.

6 The Capital of *Rome*, counted one of the 7 Wonders of the World, was Burnt *An.* 1553

9 *Jerusalem*, after it had been a long while Besieged by *Nebuchadnezzar*, was taken, *Jeremiah*, 39. 2.

12 *Julius Cæsar*, the first *Roman Emperor* was born in this Month.

15 St. *Swithin*, was Bishop of *Winchester*, and in his Life-time a very devout Man; he died *Anno Christi* 860, many to this day call him the Weeping St. *Swithin*, because about the time of his Feast, the *Precipe* and *Assely* rise colmically with the Sun, which occasion Showers; it is not unlike, but that he might (when he was alive) express his Devotion by Tears, and that the Heavens might drop at his Death: but it must be great Superstition to think he causes such Showers Yearly.

18 The *Ephesians* begin their Year. Plin. *lib.* 8 *cap.* 47.

19 Dog Days begin.

25 St. *James* the Apostle (who for his Courage was Sir-nam'd the Great) on the 25th day of this Month suffered Martyrdom, being Beheaded *Anno Christi* 43. His Courage was so great, and Cause so good, that when going to Execution he behaved himself so undauntedly, that by his Resolution and Carriage, he converted the Informer that was the Instrument of his End, and so he asked him Forgiveness, and became a Copartner in his Sufferings.

August hath xxxi days.

And is called by the *Greeks Boedromeon* from *Boedromia*, a certain Feast which was wont to be Celebrated at *Athens*, for a successful Battle fought by *Theseus* against the *Amazons*; and by the *Latins*, *Augustus*, in honour of *Augustus*.

1 *Lammas.*

Aaron, Forty Years after the Children of *Israel* were come out of *Ægypt*, died on *Mount Hor*. Numb. 33. 38.

Also on this Day *Ezra* with his Company came out of *Babel* to *Jerusalem*. Ezra 7. 9.

7 *Nebuchadnezzar* burnt the House of the Lord and all *Jerusalem*. 2 Kings 25. 8, 9.

10 Some think *Jerusalem* to have been burnt by the *Babylonians*, [Jerem. 52. 12. Josephus *lib.* 6. *cap.* 26.] and it was burnt afterwards by the *Romans* the same Day; therefore do the *Jews* on this Day observe a most strict Fast, and go bare-footed, and, sitting on the Ground, read twice over the *Lamentations of Jeremiah*.

24 *St. Bartholomew* was by birth a *Syrian*, and (and though Nephew to a *Syrian* King) by birth a Fisherman; after he had Preached the Gospel to the *Indians* and *Armynians*, &c. he was *Anno Christi* 52, on this Day first Stoned, then Excoriated, and left hanging on a Cross until the next day, and then, to end his Torments they beheaded him.

27 *Dog Days* End.

September hath xxx days.

And is called by the *Greeks*, *Mamakterion*, from Feasts dedicated to *Jupiter*; and by the *Latins*, *September*, from *Septem*, being the Seventh Month from *March*.

Sunday or our *Lord's Day (Dies Dominicus)* is a Day dedicated by the Apostles, to the more particular Service and Honour of Almighty God, and transferred from the *Jewish* Sabbath to the day following, in Memory that Christ our Lord rose from the Dead, and sent down the Holy Ghost on that day, whence it is called our *Lord's-Day.*

The *Four Sundays (Septuagessima,* being the Sunday fortnight before *Shrove Sunday*; *Sexagessima* the Sunday before *Shrove Sunday*; *Quinquagessima* or *Shrove Sunday*; and *Quadragessima* is the Sunday after *Shrove Sunday)* were days appropriated for the Devotions of *Lent*, and take their denomination from *Quadragessima* Sunday, so called, because it is about 40 days before *Easter.*

Septuagessima is a Sunday certain dependant upon *Easter*, and so called from the Number Seventy, because between that time and the *Octaves* of *Easter* compleated, are Seventy days.

Sexagessima is always the Sunday before *Shrove Sunday*, either being the sixth before *Passion Sunday*, or else from the second before *Quadragessima*, or beginning of *Clear Lent.*

Quinquagessima or *Shrove Sunday*, is always seven Weeks before *Easter*, and so called, for that it is the fiftieth day before it, or else being the fifth Sunday before *Passion Sunday*, which precedes *Easter* a fortnight.

Quadragessima is the Sunday after *Shrove Sunday*, and the first Sunday in *Clear Lent*; it is called *Quadragessima*, because our Saviour fasted forty days, and as being forty days before the Feast of *Easter.*

Shrovetide is so called from the *Saxon Shrive* or *Shrift*, for in former times the People used to confess their Sins, that the better they might prepare themselves; that they might the more religiously observe the Holy time of *Lent*, for receiving the Blessed Sacrament at *Easter.*

Ash Wednesday is the next Wednesday after *Shrove Sunday*, and is a day wherein the Antient Christians were wont to Hum-

Humble themselves, and Repent in Sackcloth and Ashes for their past Sins and Transgressions against God. Some of the Fathers call'd it *Caput Jujunii*, the Head or chief Beginning of *Lent*, which is a Time of extraordinary Humiliation in a Just and Pious Remembrance of our Saviour's fasting in the Wilderness.

Maundy Thursday, (is the last Thursday in *Lent*, and the next before *Easter*) is a Feast in memory of our Lord's last *Supper*, when he instituted the *Blessed Sacrament* of his precious Body and Blood.

And it is called *Maundy Thursday* from these words, *Mandatum novum do vobis, &c.* John 13. 34. *I give you a new Command* [*or Mandat*] *that you love one another, as I have loved you.*

Palm Sunday is the Sunday before *Easter* and was Instituted in Memory and Honour of the Triumphant Entry of our Saviour into *Jerusalem*, and was so call'd from the *Palm Branches* which the *Hebrew* Children strewed under his feet, Crying, *Hosanna* to the Son of *David*. Matth. 21. 25.

Good Friday is the *Friday* before *Easter*, and that Memorable Day on which the Great and Glorious Work of our Redemption was Consummated, by our Saviour Jesus Christ, on the Cross, between two Thieves, at *Jerusalem*.

Easter is the Principal of all other, so Ordain'd by God at first, and at this day; there be three sorts, *viz. Pascha Hebraorum*, the *Jews Easter*; *Pascha Novum*, the *Romans Easter*; and *Pascha Verum*, our *Easter*; which is a great *Festival* in Memory of our Saviour's Resurrection or Rising from the Dead on the Third Day after his Crucifixion. Matth. 28. 6.

And it is call'd *Easter* from *Orions*, (the *East* or *Rising*) one of the Titles of *Christ*; *And his Name*, says the Prophet, *shall be called Oriens.*

Holy Thursday or *Ascension Day*, is a *Feast* Solemniz'd in Memory of Christ's Glorious Ascension into Heaven the fortieth day after his Resurrection, in the sight of his *Apostles* and *Disciples*. Acts 2. 9, 10.

Roga-

Rogation Week, which is always the next but one before *Whitsunday*; the *Belgians* call it *Cruys Week*, and we in *England*, *Gang Week*, from the Ganging or Going in Procession, and Preambulations then Used about the Parish, *&c.*

Whitsunday or *Pentecost*, is the 7th Sunday after *Easter*; and so call'd, because it is the *Fiftieth-Day* after the Resurrection; it is a *Solemn Feast* in Memory and Honour of the Coming of the Holy Ghost upon the Heads of the Apostles, in Tongues, as it were, of Fire. *Acts* 2. 3. And is called *Whitsunday*, from a Custom of Antient Christians, who at this Time Cloathed themselves in *White*, and were admitted on the Eve of this *Feast* to the Sacrament of Baptism, and is called by some *Bright Sunday*.

Trinity Sunday is the next *Sunday* after *Whitsunday*; Dedicated to the Honour of the most Blessed Trinity, to signify that the Works of our Redemption and Sanctification, then Compleated, are Common to all the Three Persons that bear Record in Heaven, *viz. Father*, *Son*, and *Holy Ghost*, who are One in Substance, though Three in Subsistance, as the Scripture testifies. 1 *John* 5. 7.

The *Four Sundays of Advent* are these preceding *Christmas Day*, and were Instituted by the Church, with particular Offices Commemorative of the Benefit of our Saviour's *Advent*, or Coming to Redeem the World by his Happy Birth.

The several *Feasts* of the Apostles, and other Saints, were Instituted by the Church, to Honour God in his Saints, and for us to Imitate their Holy and Godly Examples.

A most Exact and True Account of the FAIRS, *Fixt* and *Moveable*, that are Yearly held in ENGLAND and WALES, orderly set down; with the DAYS, TIMES, TOWNS and PLACES, when and where they are kept, more largely and truer than heretofore hath ever been done by any.
